

Anton Panchenko

Java Software Engineer

 Phone: +380 50 997 02 08
 Email: anton.a.vetrov@gmail.com
 LinkedIn: [linkedin.com/in/anton-panchenko-94a4a79a](https://www.linkedin.com/in/anton-panchenko-94a4a79a)
 Date of Birth: 25.11.1987

Summary

Experienced **Java Developer** with a strong foundation in **networking** and enterprise infrastructure, in-depth understanding of **distributed systems**, and expertise in secure coding practices aligned with **OWASP best practices**.

Proven track record of building **high-load, scalable, low-latency systems**, integrating modern **DevOps, cloud, and automation** practices. Strong background in designing and supporting **secure, high-availability networks** in the banking sector, bringing valuable expertise in reliability and performance to software engineering. Skilled in leading development teams, designing software architectures, and delivering business-critical solutions across diverse domains.

Technical Skills

- **Backend:** Java (8–17), Spring (IoC, Data, Cloud, HATEOAS), Jakarta EE, Microservices, REST APIs
 - **Databases:** PostgreSQL, MySQL, Oracle, Cassandra, Memcached
 - **Messaging & Streaming:** Kafka, Apache Camel
 - **Search & Indexing:** Elasticsearch
 - **DevOps / Cloud:** Docker, Kubernetes, AWS, Linux
 - **Build / Tools:** Maven, Gradle, Git, SVN, Jenkins, TeamCity
 - **Networking Tools:** Cisco IOS (routing & switching), Nagios, Cacti (network monitoring), RANCID (config management), Citrix, FreeBSD Networking, Perl/Shell automation, Boson NetSim (network simulation)
 - **Automation & AI:** n8n (AI Agents Integration), Camunda BPM (Workflow Orchestration & Automation)
-

Languages

- **English:** Upper-Intermediate (B2), professional working proficiency
-

Experience

Java Developer (2011, present)

Recommendation Engine (2022, 3 years)

- Built a **high-performance recommendation engine** for interactive video platform.
 - Handled **15K requests/minute** with **15ms average response time**, processing **6M+ content items**.
 - **Technologies:** Java, Cassandra, Kafka, Memcached, Docker, Elasticsearch, MySQL, Kubernetes
-

PMO Automation (2022, 3 years)

- Developed **scalable automation platform** for project management workflows.
 - Processed **500+ SDLC workflows monthly** with **99.5% uptime** and **sub-200ms latency**.
 - Orchestrated real-time communication between **Jira, Confluence, MS Teams**, and **Email**, extending workflows with **AI-powered agents** for content generation and decision support via **n8n**.
 - **Technologies:** Spring IoC, Camunda BPM (Workflow Orchestration & Automation), MS Bot Framework, MS Azure, n8n (AI Agents Integration), Kubernetes
-

Delivery Service (2021, 2 years)

- Designed backend for **real-time parcel tracking** and **dynamic delivery management**.
 - Supported **7,000+ ParcelShops** in Germany with millions of daily tracking requests.
 - Built a distributed microservices-based architecture ensuring **high-throughput**, performance.
 - **Technologies:** Spring (IoC, Data, Cloud), Kafka, PostgreSQL, Docker, AWS
-

Insurance Platform (2021, 1 year)

- Developed **iOS & Apple Watch app** for wellness-based insurance policy optimization.
 - Integrated **real-time health monitoring** and **data-driven premium calculation**.
 - **Technologies:** Spring (IoC, Data), PostgreSQL, Docker, AWS
-

SAP E-Commerce (2018, 3 years)

- Built **B2B wholesale food distribution system** with bulk ordering & complex pricing.
 - **Technologies:** SAP Cloud Platform, SAP Commerce, SAP Cloud Integration
-

ERP Platform (2018, 1 year)

- Developed **modular ERP** with custom DSL for business logic and document automation.
 - Integrated **OCI services** for document scanning & intelligent processing.
 - **Technologies: Jakarta EE, Glassfish, PostgreSQL, Apache Camel, CentOS**
-

CRM – Passenger Compensation System (2017, 2 years)

- Automated claims handling for **30+ million passengers annually** across 37 airports in 6 countries.
 - Supported flight delays, cancellations, baggage loss/damage.
 - **Technologies: Spring (IoC, HATEOAS, DATA, Cloud Config), PostgreSQL, Camunda BPM, Tomcat, Ubuntu**
-

ETL – Financial Data Platform (2017, 1 year)

- Built ETL pipelines for **Eagle PACE** investment data management.
 - Supported **portfolio management, accounting, and performance measurement**.
 - **Technologies: Spring IoC, Spring Cloud Sleuth, Zipkin, Oracle, Apache Camel, Kafka, ANTLR, CentOS**
-

Healthcare – OMNI-Lab LIS (2015, 2 years)

- Developed **laboratory information system** components.
 - Integrated lab instruments, automated pathology workflows, built clinical reporting.
 - Ensured compliance with **ISO 13485** and healthcare data standards.
 - **Technologies: Java EE, Perl, Hibernate ORM, Oracle, WebLogic, AIX**
-

FinTech – Microloans Platform (2013, 2 years)

- Built **short-term loan processing system** with automated decision-making.
 - **Technologies: Spring IoC, Activiti BPM, MySQL, Tomcat, Ubuntu**
-

FinTech – Pawn Shop Platform (2011, 4 years)

- Developed **loan & collateral management system** with inventory tracking.
 - **Technologies: Java, Hibernate ORM, Tomcat, JavaScript, XMPP, MySQL**
-

Network Engineer (2005, 2011)

Finance Sector

- Designed and maintained **secure, high-availability network infrastructure** supporting critical banking operations across multiple branches.
- Configured and optimized **Cisco IOS routers and switches**, ensuring low-latency and resilient data routing.
- Administered **FreeBSD** and **Microsoft Servers** for enterprise services, including **Citrix-based remote access**.
- Automated routine operations with **Perl** and **shell scripting**, improving reliability and reducing manual effort.
- Configured and monitored **network services** (TCP/IP, DHCP, DNS, SNMP), providing stable connectivity for business-critical applications.
- Utilized **Boson NetSim** to design and test virtual network topologies prior to production deployment, improving reliability of configuration changes and minimizing downtime
- **Technologies: FreeBSD, Cisco IOS, Microsoft Servers, Citrix, Perl, Shell scripting, TCP/IP, DHCP, DNS, SNMP**
